# Subject Index

All mineral names occurring in titles, subtitles, and abstracts are indexed. Mineral names **not** listed in the index of M. Fleischer, Glossary of Mineral Species, 1980, are marked with an asterisk (\*). Chemical formulas are according to M. Fleischer (in some cases simplified) or as given by authors. Also indexed are revised subject key words submitted by the authors. The numbers refer to the title page or, in some cases, to a subtitle page.
